AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A paper container having a hexahedral configuration which is

formed by shaping paper into a box, said paper container comprising:

a container main body and a lid member hingedly attached to a back side edge part of an

upper end open surface of said container main body for selectively closing the upper end open

surface,

an inner carton part being mounted on and separate from an inner side of said container

main body and a concave cutout part being formed as a complete opening in a front board of said

inner carton part said cutout part being large enough to allow removal of contents of said box from a

front side, and

said lid member comprising an upper surface lid part for covering said upper end open

surface, a front surface lid part large enough to cover said concave cutout part, and a pair of side lid

parts interposed between side edge parts of said upper surface lid part and side edge parts of said

front surface lid part and adapted to vertically join said front surface lid part with said upper surface

lid part,

said container main body and lid member being formed by cutting and dividing said

hexahedral paper box through a severance guide line extending from opposite ends of a connecting

ridge line between an upper board and a back board of said paper box, and

said severance guide line extending obliquely downward from the opposite ends of said

connecting ridge line along a pair of side boards and extending along said front board beneath said

concave cutout part formed in the front board of said inner carton so that an upper half of said front

board of said inner carton part is above said severance guide line; and

said cutout part and said lid member being of a size to allow contents of said container to be

removed when the upper surface lid part of said lid member extends only as far backward as said

back board,

wherein said paper container is for storing a sheet-like detergent, a tablet-type detergent

or an agglomerated detergent- having an oil containing-content,

wherein said paper is formed of a paper base material, a printed layer covering an outer

surface of said paper base material, an outer colored film covering an outer surface of said printed

layer, and an inner film covering an inner surface of said paper base material.

2. (Cancelled)

3. (Original) A paper container according to claim 1, wherein a lock part is disposed

beneath said concave cutout part and adapted to lock a lower end part of said front surface lid

part of said lid member.

4. (Canceled)

5. (Previously Presented) A paper container according to claim 1, for storing a packaged

detergent.

6. (Previously Presented) A paper container according to claim 1, for storing a sheet-like

detergent which is packaged with a water-soluble sheet and stacked up in layers, and

wherein an inner surface of said lid member in a closed position overlies said inner carton

part, and said container main body, said inner carton part and lid member are formed of a

moisture-proof material.

7. (Withdrawn) A paper container according to claim 1, in which an inner flap, an

intermediate flap and an outer flap extending from each side surrounding a bottom surface of

said container main body or an upper surface of said lid member are overlapped with one another

in this order and bonded together,

wherein said intermediate flap is provided at a part thereof with a cutout part.

8. (Previously Presented) A paper container according to claim 1, wherein said front

board of said inner carton part is made of a single piece.

9. (Cancelled)

10. (Previously Presented) A paper container according to claim 1, wherein said sheet-

like detergent or tablet-type detergent are contained in a multi-layered manner.
